This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Commonwealth of Massachusetts.

ATTORNEY-GENERAL'S OFFICE, BOSTON,
January 17, 1865.

To the Honorable Speaker of the House of Representatives:

SIR,—I herewith submit to the legislature a statement of the causes conducted by me, as Attorney-General, during the past year.

The matters of chief importance which remains unfinished at the expiration of my official term, are sundry writs of error, pending in the Supreme Court of the United States, which are intended to raise the question whether the internal revenue laws of the United States are so far paramount to the statutes of the Commonwealth prohibiting the sale of intoxicating liquor, as to exempt from criminal liability parties who have paid excises and procured licenses to sell such liquors at wholesale or retail, from the collectors of internal revenue.

These writs of error were all commenced nearly a year ago, but were entered on the docket of the Supreme Court at Washington only last December, where, in the ordinary course of business in that court, they will not be reached for argument until a year hence. I have been led to suppose that a special assignment might be obtained which would dispose of them at an early day, and I have done all I could to aid the defendants' counsel in securing such an arrangement. But thus far the court have refused to make any such assignment, and I have no reason to anticipate a decision before December next.

There are also two important cases connected with the interests of the Commonwealth in the Troy and Greenfield Railroad

Digitized by Google

Company which will be argued in the course of the present month in our own Supreme Court. And there are various actions pending to recover the taxes due the Commonwealth upon the dividends of non-resident stockholders in corporations, under chapter 236 of the Acts of 1863, repealed by section 18 of chapter 208 of the Acts of 1864 but with a reservation of the right to collect the past taxes. Few of these have been paid, and should our own court sustain the constitutionality of the Act of 1863, the defendants will undoubtedly appeal to the Supreme Court of the United States.

I desire once more to ask the consideration of the legislature to the subject of reform and simplification in the rules of criminal procedure recommended in my former Reports.

Time and experience have strengthened the conviction, heretofore expressed, of the utility and feasibility of adopting in Massachusetts the entire modern English system which has commended itself to the approbation of all who have studied its theory or observed its practical operation. Either in England or Pennsylvania a proposed return to the strictness and technicalities of common law criminal pleading would be regarded in the same light as an attempt to revive any other obsolete usage of the uncivilized period in which it originated.

The series of complicated and artificial rules by which the system of criminal procedure is made an abstruse science, find their explanation and only apology in a condition of society long since passed away. When the accused were not permitted to have counsel address the jury on their behalf, and the most trifling thefts were punished by death, it was commendable in courts and lawyers to mitigate the severity of sanguinary statutes, by giving those who had few facilities for a fair defence upon the merits, and who were subjected, in case of conviction, to sentences of inhuman severity, every possible chance of escape upon formal objections. But this was a poor substitute for just laws fairly administered; and the fact that the ancient system has survived so long its sole justification must excite the surprise of all who regard the administration of justice as designed to protect the innocent and punish the guilty, and who consider that the wisdom of the system must depend upon its judicious adaptation of means to accomplish this end.

At different times many steps in the direction of reform have been taken in this State, among the most important of which is chapter two hundred and fifty of the Acts of eighteen hundred and sixty-four. But, although the principle has been already admitted, much remains to be done to secure the full benefit of its practical operation. Little would seem to be necessary to obtain universal assent to the requisite legislation, except to excite sufficient interest in the subject to secure its candid examination. Nevertheless, at the threshold of the investigation, a question is sometimes made as to the constitutional power of the legislature to institute the proposed reforms, and an objection is founded upon that clause in the Declaration of Rights which provides that "no subject shall be held to answer for any crime or offence, until the same is fully and plainly, substantially and formally, described to him." In the word *formally* the obstacle is supposed to lie. But this expression may be interpreted to mean, either "in accordance with the forms in use at the adoption of the constitution," or "according to such reasonable forms as may be prescribed by legislation, and as shall plainly and substantially declare to the defendant the nature of the accusation upon which he is arraigned." Since no changes have been proposed which would render indictments less intelligible and definite in the substantial information which they contain, the first construction of the article is the only one requiring refutation.

The founders of this Commonwealth framed the declaration of rights as a general statement of principles and of the rights of the people. It is inconceivable that they could have meant to perpetuate any mere forms of procedure, irrespective of their essential value. If they had intended to tie the hands of legislators for all coming time on this subject, they would have made use of very different and explicit language. It would have been easy to say "in accordance with the forms of the common law," or, "without changing existing forms," and it is hardly possible that they trusted to a single adverb a prohibition involving such serious and extensive abridgment of governmental power.

Upon this question, the practical exposition contained in numerous statutes, already enacted, is quite decisive.

Digitized by Google

Section 14 of chapter 137 of the Revised Statutes provides that no indictment shall be quashed or deemed invalid, nor the judgment or proceedings thereon be arrested or affected, by reason of certain defects of form and omissions or misstatements.

Chapter 186 of the Acts of 1860 simplifies and changes the form of indictment for perjury, borrowing the leading features of Lord Campbell's Act as to this offence.

Chapter 250 of the Acts of 1864 enacts that no variance between any written or printed matter offered in evidence and its recital in the indictment shall be deemed material, provided its identity is evident and its purport sufficiently described.

Every one of these Acts recognizes the right of the legislature to make reasonable changes in existing forms of indictments. And although the judicial department of the government possesses the power, in the last resort, to determine what forms are sufficient to comply with the requirements of the declaration of rights, yet there is no reason to apprehend any obstacle in this direction. Not only have the courts uniformly assumed the legality of all former changes, but the very question has been adjudicated upon by the highest tribunal, and its decision is thus explicitly stated by Chief Justice Shaw, in the case of Commonwealth *v.* Patrick Holley, 3 Gray, 458:—"The object of the declaration of rights was to secure substantial privileges and benefits to parties criminally charged; not to require particular forms, except where they are necessary to the purposes of justice and fair dealing towards persons accused, so as to insure a full and fair trial." In this case the court expressly upheld the constitutionality of a statute allowing the amendment of an indictment in its allegation of a former conviction.

After this long continued practical exposition of the clause, and such an unequivocal affirmation of the principle contended for by the most eminent jurist and magistrate this Commonwealth has produced, it is safe to affirm that the control of the legislature, within the bounds of reason and natural justice, over the forms of criminal pleading, is no longer an open question.

But it is sometimes suggested that simplification of forms and the permission of amendments in criminal pleadings, would

Digitized by Google

encourage careless and slovenly habits among prosecuting officers, and make, as it is said, "poor lawyers." To this objection it is fair to answer, that if the alterations are in themselves beneficial, and tend to ameliorate the administration of justice, they ought not to be rejected for the sake of the legal profession, either to improve the education or to maintain the monopoly of the bar. But it is more satisfactory to reply that artificial technicalities are defects, and not essential features in any system of jurisprudence. The science of the law depends as little upon the barbarous jargon of ancient pleadings as that of medicine does upon the hieroglyphics in which apothecaries' prescriptions are written. Such technicalities are obstacles and impediments instead of advantages. As in other sciences, improved nomenclatures are steps in progress; so in the law, to simplify forms is to allow more scope for the symmetrical developments of principles. Lawyers themselves would gain greatly by removing a ground of reproach which has always lowered their profession in public estimation. They can ill afford even to seem to deserve the reproach of being "the conservators of barbarous usages." They do not deserve it, for with them have originated nearly all the useful improvements in jurisprudence which have ever been adopted. It is hardly necessary to dwell upon the benefits of the highest attainable simplicity. To most minds it is obviously an advantage in itself, and should not be departed from without substantial reasons. The office of an indictment is to state plainly and accurately the facts which constitute the charge against the party to be tried. Such a written instrument is made the foundation of criminal proceedings for the sake of informing the defendant of what is alleged against him, and enabling him to prepare his defence; also, for the purpose of presenting distinctly the issues to be tried, and in order that a permanent record of the proceedings may remain to protect the party, whether acquitted or convicted, from a second prosecution for the same cause; and, in cases of conviction, to exhibit the legality of the sentence imposed, and the just proportion between the crime and its punishment. Other reasons might be added, but, manifestly, established forms have not been invented and employed for their own sake,

Digitized by Google

but for some real or supposed utility, and when a particular form is shown to be inconvenient or embarrassing, those in favor of retaining it should be required to make out their case and establish the fact that there are sound reasons for its continuance. Tried by this standard, what conceivable utility is there in requiring an allegation of time and place to every fact stated?—a rule which sprinkles each page of an indictment with useless repetitions of the words "then and there," although the time and place proved need not be the same as are alleged. Why should an indictment for false pretences be required to set forth minutely the specific pretences by which the property was procured; and, if a fraudulent purchase was the means employed, to state with precise accuracy the terms of the contract of sale, when an indictment for larceny is burdened with no such requirements, and such matters relate to the evidence, and not to the essence of the charge? Why should an indictment for murder state the mode of killing —the length and breadth of the wound—the instrument with which it was inflicted, and the hand in which such instrument was held? Especially when none of these particulars need be proved as they are alleged, and a man may be charged to have committed murder with an axe, and found guilty, upon proof that he did it with a penknife or needle; or may be charged with poisoning another with strychnine, and convicted upon proof that he poisoned him with arsenic. If the name of the defendant, or of the person injured, or of some place is erroneously described, why should not an amendment be permitted, provided the identity of the offence is apparent, and the alteration can be clearly seen to be only the correction of a mistake?

I forbear to adduce other illustrations of the irrational requirements of the common law system as adopted and still in force in Massachusetts, although they might be multiplied indefinitely, as every one in the least conversant with the subject is aware. Neither do I deem it necessary to recapitulate the particular provisions of law required to effect the reformation advocated; the models of English and Pennsylvania statutes are accessible, and my object is to urge the subject upon the legislature, being fully persuaded that attention to it will

Digitized by Google

inevitably induce the adoption of the changes desired. In the existing condition of the law of this Commonwealth, Massachusetts is justly obnoxious to the reproach of having been far outstripped in true progress and reform by more conservative England and less enlightened Pennsylvania.

The freedom and confidence with which I express myself would be presumptuous if I were advocating original views of my own, but the measures I recommend have neither the merit nor the disadvantage of novelty; they are so fully sanctioned by their results elsewhere that the policy of their adoption can no longer be regarded as dubious or experimental.

Among the beneficial practical results to be anticipated from the introduction of a reformed system, would be greater promptness and certainty in convictions, and a reduced number of acquittals upon grounds irrespective of the guilt or innocence of the accused. It always shocks the natural sense of justice, and tends to bring the administration of the law into contempt, when a guilty man, against whom there is no deficiency of evidence, escapes punishment on technical grounds. Yet such cases are so frequent that their occurrence excites no surprise, and the chances of them are always sufficient to be counted upon by criminals, their counsel and the community. Indeed, a criminal trial is popularly regarded as a field for the display of professional ingenuity and acumen, quite as much as a solemn and fairly conducted investigation of the truth. It will hardly be contended that such chances of impunity are rights to which the accused are entitled. Innocent men do not need them. The guilty, who are destitute of counsel, seldom derive any benefit from them. To convicts themselves they are an injury, for something is added to every sentence by way of compensation for the chances of escape thus afforded, because the greater the uncertainty of punishment, the greater must be its severity when an opportunity to inflict it occurs. Even parties acquitted on the merits are, indirectly, sufferers from the present state of the law, since there is, at least, one substantial right of which they are deprived in consequence. In all trials, except for offences punishable by death or imprisonment for life, the accused must defend himself at his own expense, and does not even receive reimbursement for

Digitized by Google

the costs of the witnesses whom he has been compelled to summon to refute an unsustained accusation. This grievous hardship, contrary to natural justice and to the invariable rule in civil controversies, has hardly any other apology except that so many of the acquitted are really guilty, and escape only upon technicalities.

Thus every one is interested to change and improve the law in this respect, except those, among the guilty, who are conscious that their only avenue of escape from deserved punishment depends upon the difficulty of conviction, created by artificial requirements.

I have the honor to be,
Very respectfully,
Your obedient servant,

DWIGHT FOSTER,
Attorney-General.
